

Product News

Cane Attachment

Cane Plus Inc

Grip 'n Rise, a simple collar attachment for canes, is designed to help patients stand up securely by providing a center of gravity and relieving pressure on the knees. The collar is made from polycarbonate plastic and bears a weight up to 275 lb. It slips onto the cane and locks on with an Allen key.

Run Belt

Fitness With Joe

The patented EZ Run Belt is designed to help patients poststroke immediately improve mobility, balance and control. The belt gives firm foundation and alignment, says the manufacturer, and it prevents hyperextension of the knee while the patient is walking, standing, or in rehabilitation.

Wheelchair

Freedom Designs Inc

The TriPod, a manual wheelchair featuring mid-wheel drive, allows the user's hand to fall naturally into place while propelling the chair. The chair features large wheels and a tilting frame that allows the user or caregiver to maneuver efficiently over small objects and low curbs.

Sit-to-Stand Trainer

Neurogym Technologies Inc

The Sit-to-Stand Trainer enables patients to initiate the movement of standing even with weakened or seemingly unsuccessful effort. Through continued training and gradual reduction of the counterweight, a patient can relearn the "standing-up" skill.
