G                      Dm7    G                      Dm7  
I miss you so very badly, I'd kiss you if you were here

G                      Dm7    G                      Dm7  
And I'd do it so very gladly, just to know that you were near

Am                      G              F              Em      G  
You were alive all my life-time, I know now how you feel

G / Dm7    G / Dm7    G / Dm7    G / Dm7

G                                      Dm7      G                                      Dm7  
When I saw you go you were traveling, I knew you were going to your God

G                                      Dm7    G                                      Dm7  
And like a mystery that was unraveled, I thanked the good Lord for the things he taught

Am                                      G                      F    EmG  
He had a plan for your life-time, your after-life too
