(verse 1)    Feel the joy  
              Feel the pain  
              Fly high and low  
              In this private plane

(verse 2)    Soaring into  
              Heaven space  
              Diving down  
              With willing grace

(chorus 1)    It's all right on time  
              Human life and love to be  
              Experience sublime  
              Part of learning to be free

(verse 3)    Let it come  
              Let it go  
              See the truth and  
              Watch it grow

(verse 4)    It doesn't matter  
              What you feel  
              The mind is all  
              That makes it real

(chorus 2)    One moment all seems black    (change of key)  
              Exploding from a tiny crack  
              In a veil of false relief  
              Past and limited belief  
              Angels tender wings caress  
              Release the lie...the heaviness

(instr break) <----->

(chorus 3)    It's all right on time    (back to original key)  
              Part of learning how to see  
              Chaos turns to rhyme  
              Eagles flying gracefully

(chorus 4)    All right on time  
              What we ask is what we find  
              A choice to create  
              Paradise beyond the gate...

(ending)    Of time...Any time...Right on time.....Right on...time
